

## Customer presentation

ITASYSTEM is an Italian company, with long experience in production of plastic labels and related machinery in the food industries. Since the 1982 Itasystem has achieved the European and USA Patent, and has also improved the business sector of print and paper industry.

### ✓ Problem...

The Company was in need of an improvement of the warehouse, in term of storage performance and inventory control

### ✓ Solution!

The Modula Lift ML50 chosen, allow to manage all the items of the warehouse, and mainly the parts for the production, with high picking frequency and huge space saving; this, together with the cleaner and more ordered way of storage, makes a huge improvement comparing with the previous static way of speed and items traceability.
