ADAPTABLE SPACES FOR A COLLEGE LIBRARY

Combining form and function to create versatile solutions

Faculty and staff wanted to create adaptable and aesthetically pleasing spaces on the main floor of this new college library, so they opted for Spacesaver's A-Frame carts and cantilever carts. The shelving units have the appearance of stationary shelving combined with the flexibility of mobile carts.

Upper floors were fitted with taller stationary cantilever shelving, and a compact mobile system was installed in the archives area. All shelving units in the public areas were finished with custom wood end panels to coordinate with the rest of the library's interior design.

A-Frame Carts

Cantilever Carts with Concealed Casters

Stationary Cantilever Shelving

Compact Mobile Shelving in secure archives

During the planning and design process, the Chicago-based Spacesaver distributor consulted with faculty and staff to understand their needs and help create the optimal solution. Spacesaver's in-house engineering and manufacturing teams worked with the distributor to coordinate product design, manufacture, and installation.
